HOUSEHOLD WASTE SORTING INSTRUCTIONS 2024

TAKE TO A WASTE RECEPTION STATION OR OTHER COLLECTION/RECEPTION POINT

Waste reception stations accept waste other than ordinary household waste.

Waste can be delivered in a car, trailer or van in loads up to a maximum of 1 m³.

PILLERI Waste Reception Station in Lahti also accepts larger loads.

ELECTRICAL EQUIPMENT

- household appliances, devices and tools of all sizes that operate on mains power or batteries
- energy-saving lights, fluorescent tubes, LED lamps

i Materials are recycled into raw materials for new products.

HAZARDOUS WASTE

- paints, glue, varnishes, solvents, acids
- oils, waste contaminated with oil, vehicle liquids and scrap batteries
- chemicals with a warning sign
- cosmetics classified as hazardous waste, such as nail varnish, perfumes and aftershave
- plant-protecting agents and pesticides
- batteries and small accumulators should be taken to a collection point with their poles covered with adhesive
- medicines and mercury thermometers should be returned to a pharmacy

Households may bring 50 kg/50 litres of waste per year free of charge.

i Handled in a processing plant for hazardous waste. Some of the waste may be used for energy generation and recycled as raw material.

The waste reception stations accept credit and debit cards.

To have ordinary domestic waste collected, properties must join the waste management system.

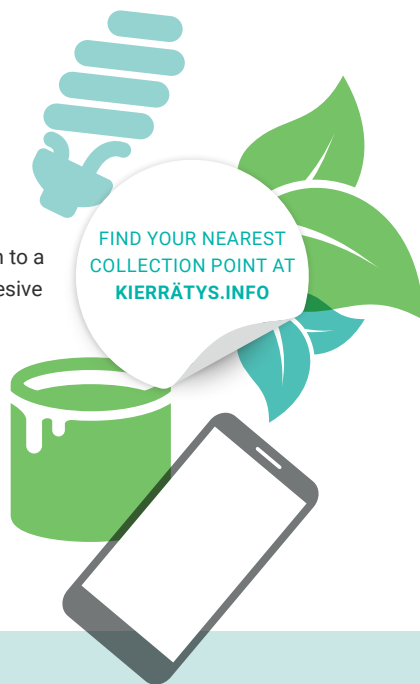

Read more: salpakierto.fi/en/ -> Waste management for residential properties

GARDEN WASTE

- twigs and branches
- garden waste

Garden waste is accepted by waste reception stations free of charge as separate loads.

i Twigs and branches are used in energy generation. Garden waste is utilised in the production of biogas and soil.

OTHER WASTE ACCEPTED BY WASTE RECEPTION STATIONS

- wood (including furniture)
- treated (impregnated) wood
- concrete and bricks
- insulation fibres, tiles
- sanitaryware
- asbestos (packaged and labelled)
- roofing bitumen
- gypsum
- asphalt
- window glass
- furniture, mattresses
- metals
- tyres
- tree stumps
- soil from earthworks
- pieces of paper that contain sensitive personal information
- VHS tapes
- large items of mixed waste that cannot be disposed of in the property's waste containers
- other large waste loads

Separate different materials to reduce waste reception charges

i Primarily used as raw material for new products or utilised in energy generation.

END-OF-LIFE TEXTILES

To be disposed of as end-of-life textiles: Clean and dry clothes and household textiles that are no longer usable, such as

- coats, trousers, skirts, shirts
- sheets, towels and tablecloths

Place in a plastic bag and close the bag securely.

Not accepted at the collection:

- underwear, socks
- pillows, covers, upholstery
- rugs
- belts, bags
- footwear
- damp or mouldy textiles or textiles with fabric pests or strong odours

Dispose of textiles that are not suitable for recycling in the property's mixed waste bin.

Donate usable clothes and textiles to a charity.

i Unusable household textiles taken to an end-of-life textile collection point will be reused as recycled fibre, for example.

DISPOSE OF THE FOLLOWING IN THE PROPERTY'S WASTE CONTAINER

MIXED WASTE

Household waste that cannot be placed in other waste containers, such as

- plastic products other than packaging, e.g. plastic bowls and cups and plastic packaging straps, string and bands
- baking paper
- clingfilm and freezer bags
- photographs, slides and similar
- candle stubs
- nappies, sanitary towels, cotton pads and other hygiene products
- rubber, leather and artificial leather products
- vacuum cleaner bags, cigarette butts and chewing gum
- incandescent light bulbs, halogen lamps, fuses
- chinaware and ceramics, glassware, mirrors
- used ink cartridges, VHS tapes, DVD discs and other similar products
- various adhesive tapes, strings, gift ribbons and wrapping paper
- pieces of wood and chipboard

i Usable materials, such as metals, are utilised as raw materials. The remaining materials are used in energy generation.

DISPOSE OF THE FOLLOWING IN THE PROPERTY'S CONTAINER OR COMPOSTER

BIOWASTE

- leftover food
- fruit and vegetable peelings
- coffee grounds and tea leaves, along with filter papers
- solid and runny cooking fats and oils
- waste from fish and small bones
- tissue papers, such as kitchen roll and paper napkins
- flower soil and plant waste
- small wooden items, such as ice cream sticks and toothpicks
- vitamins and micronutrients without their packaging

Soak up runny cooking fats, liquids and broths in tissue paper, an egg carton or newspaper. Package in a paper bag, biodegradable bag or paper wrapping.

i Utilised in the production of biogas and soil.

DISPOSE OF THE FOLLOWING IN THE PROPERTY'S WASTE CONTAINER, OR TAKE TO RINKI ECOPOINT OR OTHER COLLECTION POINT

PAPER

- newspapers and magazines
- advertisements and brochures
- envelopes (including those with a window)
- office and drawing paper

Only dry and clean paper.

Do not tie paper materials together with twine.

i Reused in the production of paper, such as newspaper.

DISPOSE OF PACKAGING IN THE PROPERTY'S WASTE CONTAINER OR AT A RINKI ECOPOINT

PLASTIC PACKAGING

- plastic packaging for foodstuffs, including with aluminium lining
- plastic bags and wrappings
- bottles for detergent, shampoo and liquid soap
- other plastic household packaging
- ESP packaging
- plastic packaging filling

Packaging must be empty and dry. Do not place packaging made of different types of plastic inside each other. Separate bottle tops, lids and other packaging parts, if possible. The plastic used for these is often different from the plastic used for the actual packaging. Separating them improves the efficiency of recycling.

Packaging materials are sufficiently clean for recycling when they can be stored at home for a couple of days without notable odours.

i Some of the waste is used as raw materials and some is used for energy generation.

CARTON PACKAGING

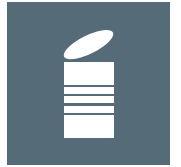

- drinks cartons
- other cardboard containers, wrappings, cartridges and trays
- paper bags
- cardboard boxes

Packaging must be empty, clean and dry. Flatten the packaging and place inside one box

i Reused in the production of carton products.

METAL PACKAGING

- metal packaging
- small metal household items

Packaging must be empty and dry. Take large metal items to a waste reception station.

i Reused in the production of new metal products.

GLASS PACKAGING

- glass jars
- glass bottles

Glass packaging only! Remove lids and bottle tops. Rinse dirty glass containers.

i Reused in the production of new glass containers.

Do not place batteries, electrical devices or hazardous waste in the property's waste bin! They cause a fire hazard during waste processing.
