THANK YOU FOR SORTING

Bin there, done that!

Scan the QR code and check out videos on:

- Always recycle in Finland ✓
- What it´s like sorting in Finland ✓
- Why sorting matters? ✓

Are you a waste sorting master? Do the test!

PLASTIC PACKAGING
If it is a packaging and it is made of plastic.
Packagings must be empty.

CARTON PACKAGING
If it is a packaging and it is made of cardboard.
Packagings must be empty. **Remember to flatten.**

METAL PACKAGING
Metal packaging and small metal household items.
Materials/packagings must be empty.

GLASS PACKAGING
If it is a packaging and it is made of glass.
Empty, with caps and lids removed.

PAPER
Paper that comes through the mailbox,
office and drawing paper.

MIXED WASTE
Household waste that cannot be
placed in other waste containers.

Take broken furniture and other large waste items to
the waste reception station.

BIOWASTE
- foodwaste
- coffee grounds and tea leaves, along with filter papers
- solid and runny cooking fats and oils
- tissue papers, such as kitchen roll and paper napkins
- plant fibre-, wood- or bentonite-based pet bedding

The recommended packaging is a paper bag. Do not pack biowaste in a plastic bag!

Return to the store:

DEPOSIT BOTTLES
Recycle deposit packages such as plastic or glass bottles and metal cans using a reverse vending machine in stores.

Return to the store:

BATTERIES
Batteries and small accumulators should be taken to a collection point with their poles covered with adhesive.

Return to the store or waste reception station:

ELECTRICAL EQUIPMENT
- all sizes of household appliances, devices and tools that operate on mains electricity, rechargeable batteries, disposable batteries or solar power
- energy-saving lights, fluorescent tubes, LED lamps

Return to waste reception station:

HAZARDOUS WASTE
- chemicals with a warning sign
- cosmetics classified as hazardous waste, such as nail varnish, perfumes and aftershave
- **medicines should be returned to a pharmacy**
